DAYADET NON ELECTRIC DETONATOR

Great Velocity of detonation, greater sensitivity and a longer shelf life

DAYADET

Dengan teknologi yang handal, produk ini memiliki performa yang sangat baik untuk operasi peledakan open pit atau underground, kuari, dan sipil.

Digunakan untuk in hole delay detonators, Dayadet Detonator Non Electric memiliki kekuatan yang tinggi dengan penundaan waktu piroteknik yang akurat dan presisi untuk tambahan pilihan delay disaat atau diantara pola peledakan. Produk ini dikemas menjadi enam tabung blok yang diberi warna sesuai dengan waktu delay-nya.

Dayadet Detonator Non Electric digunakan untuk inisiasi peledakan dengan berbagai macam variasi shock tube dengan kepanjangan yang dapat disesuaikan dengan permintaan (custom).

Using reliable technology, this product has excellent performance for either open pit or underground blasting operation, and also quarries and civil works.

Used for in hole delay detonators, Dayadet Non-Electric detonators have high strength with accurate and precise pyrotechnic delay timing for additional delay options within or between blasting patterns. The Product is offered in a six-tube block capacity which is color-coded based on the delays.

Dayadet Non-Electric denotators are used for blasting initiation and offered in various shock tube length customized based on the demands.
