

DAYADET®

NON ELECTRONIC DETONATOR

HIGH STRENGTH, PRECISE DELAY TIME, EASY TO USE AND THE HIGHER SAFETY STANDARD

Nilai TKDN

50% (est)

Dayadet® Detonator Non-Listrik memiliki kekuatan yang tinggi dengan penundaan waktu piroteknik yang presisi serta memiliki pilihan rentang waktu tunda yang luas. Produk ini memiliki performa yang sangat baik untuk operasi peledakan *open pit, underground, kuari dan sipil*.

Dayadet® Detonator Non-Listrik digunakan untuk inisiasi peledakan dengan berbagai macam variasi panjang *shocktube* yang dapat disesuaikan dengan permintaan (*custom*) serta dapat digunakan untuk berbagai jenis bahan peledak primer.

Dayadet® Non-Electric Detonator has high power with precise pyrotechnic time delays and has a wide selection of delay time ranges. This product has an excellent performance for open pit, underground, quarry and civil blasting operations.

Dayadet® Non-Electric Detonator is used for the initiation of blasting with a wide variety of shocktube lengths that can be adjusted to custom and can be used for various types of primary explosives.
